”

“In the age of information overload, systematic review and meta-analysis provide the clarity and rigor needed to distill vast amounts of data into actionable insights”

About the workshop

Qualitative and quantitative pooling of evidences from existing literature provides wealth of evidences on existing knowledge.

Current 3-day workshop aims to train the medical faculties / researchers engaged with clinical / translational research in learning methods to execute systematic review and meta-analysis.

Who should apply?

- Minimum essential qualification is post-graduate degree in medical sciences
- Affiliated to academic / research Institute
- At least 5 publications in peer reviewed journal
- Willing to submit research proposal for hands on training at workshop

Selection Process & Important Dates

Complete the registration form (Google Form) and upload the documents. **31 Mar '24**

Screening and selection will be done based upon the academic credentials and write-up. **20 Apr '24**

Final date to submit concept proposal (selected candidates) **10 May '24**

Final list of candidates selected will have to pay registration fees **25 May '24**

Number of participants is limited to 25

Resource Faculties

Dr. Samiran Panda ([link](#))

Dr. Bhavanishankara Begapally ([link](#))
